Notes:

Fully Diluted Market Cap is calculated as closing stock price times fully diluted shares (total common shares outstanding, plus any assumed exchangeable units or other ownership converted to common stock, plus the amount of any other "in-the-money" instruments which are convertible to common stock, such as stock options/awards, restricted stock and non-voting participating preferred stock)

Enterprise Value is equal to Fully Diluted Market Cap, less cash & equivalents (including marketable securities), plus total debt, plus minority interest

Estimates are based on analyst median consensus calendar year estimates

FII organic AUM growth represents long-term AUM only. HLNE organic AUM growth represents fee-paying AUM only

EBITDA multiples for Alternative Asset Managers derived using "Economic Net Income" where applicable

Performance is based on dividend-adjusted returns

Notes:

Fully Diluted Market Cap is calculated as closing stock price times fully diluted shares (total common shares outstanding, plus any assumed exchangeable units or other ownership converted to common stock, plus the amount of any other "in-the-money" instruments which are convertible to common stock, such as stock options/awards, restricted stock and non-voting participating preferred stock)

Enterprise Value is equal to Fully Diluted Market Cap, less cash & equivalents (including marketable securities), plus total debt, plus minority interest

Estimates are based on analyst median consensus calendar year estimates

All figures converted from local currency to USD using applicable FX rate

Performance is based on dividend-adjusted returns
